***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 11/5/08 has been entered.

***Allowable Subject Matter***

2. Claims 1-29 are allowed.
3. The following is an examiner's statement of reasons for allowance:

Regarding claims 1, 11, and 20, the prior art reference to Chaney teaches a television system for receiving a plurality of digitally encoded television programs which includes circuitry for selecting a particular digital data transmission channel from a plurality of digital data transmission channels containing a desired television program. The prior art reference to Schein teaches a television unit which allows a user to access their email and the Internet. The prior art reference to LaJoie teaches a channel associated with one or more accessed web pages. The prior art reference to Elliot teaches scheduling messages to be sent at a future time. The prior art reference to Rao teaches detecting a free channel and associating the free channel with a program. The prior art reference to Kusaba teaches when a program is not associated with a channel, an icon displayed on a display screen which allows the user to designate a channel for

the program to be transmitted on. The prior art reference to DeFreese teaches wherein information used upon connection to a network is set to a table separate from a table containing channel setting information. The prior art reference to Dupperrouzel teaches the sites last viewed are displayed on start up. The prior art of record fails to teach or fairly suggest wherein when a channel associated with one or more accessed web pages is selected, the most recently viewed portion of the associated one or more accessed web pages is displayed in an off-line mode first and then is updated according to a user's operation.
